

Note Card Master

Rest Card Master

Editor's note: In order to mass produce the cards, you can make a master on 8 1/2 x 11 paper. Three of the cards will fit (well, not exactly — you will have to trim approximately 1/2" from one side of the copies) on one sheet. Or, you can enlarge a card to 150% of its original size and three enlarged cards will fit almost

exactly on a sheet of 11 x 17 paper.

The sample cards that Lora sent along with her submission were copied on card stock and then laminated. We highly recommend laminating the cards.

Hint: Laminate the whole page and then cut the individual cards apart.
